

Telemetry GPS Module 2.0 Installation Instructions

Covers Part #6551X, 6553X

Note: Traxxas models may have some Telemetry-ready parts installed from the factory. Please inspect the model before installation.

Required for Telemetry GPS operation:

- TQi radio system with Traxxas Link™ Wireless Module (part #6511)
- Traxxas Link receiver (part #6533)
- Telemetry Expander 2.0 (part #6550X)
- Apple® iOS or Android™ mobile device (visit Traxxas.com for a list of current compatible devices)
- Traxxas Link App (latest version available free from the Apple® App Store™ or on Google Play™)

B Install the GPS module, aligning the GPS connector with the GPS port. The GPS module snaps into place when properly installed.

Note: Before reinstalling the expander cover, power up the system and verify that the GPS has linked, indicated by a solid green LED on the expander. If the LED is blinking red, there is an error in the system. Visit Traxxas.com/telemetry for complete information and instructions on compatible devices and using the Traxxas Link App and the Telemetry Expander to capture and display real-time telemetry.

Note: Before sealing the cover on the Expander, ensure that the blue O-ring is properly seated in the groove.
